About Me

An ambitious, novice front-end developer, passionate about web development and designing attractive user experiences. Creative, detail-oriented and imaginative with developing skills in JavaScript, React.js, jQuery, CSS, Bootstrap, HTML, Git. I am seeking a front-end developer position in a company which prides itself in providing clients with outstanding web solutions.

Career

Ministry of Finance (2012 – June 2021)

During my nine years of working experience in Government I worked in the Cabinet of the Minister of Finance in charge of administrative affairs related with the Minister and State Secretary, later as a Cabinet Officer for the issues related to Tax and Customs policy. From 2016 to June 2021 I worked in the Tax and Custom Policy Department, specifically in the field of Excise Duty Policy and EU Directives in the area of Excise Duties.

Education

Brainster Academy (2021 - 2022)

Education and practical skills in the field of Front-end Web Development: HTML, CSS, Bootstrap, UX/UI, JavaScript, JQuery, AJAX, React.js, Git, Scrum.

During the courses at the Brainster Academy, in addition to regular projects, challenges and tasks, I worked on two projects organized by Brainster, where we developed a complete responsive web solution (user and admin panel), with cross-academy collaboration with the Full stack Academy, for Special Olympics Macedonia and St Cyril and Methodius University's students Assembly. I was also selected as student of the month at the Front-end Academy.

My projects and some of the Challenges can be found at the following link <https://danieladam-portfolio.netlify.app>

Faculty of Economics – European University - Skopje (2016 - 2019)

Master's Degree in the field of Financial and Bank Management

Faculty of Administration and Management of Information Systems - University St. Kliment Ohridski - Bitola (2007 - 2010)

Bachelor's Degree in the field of Public Administration: Economy, Law, Management and Finance majors

Skills

JavaScript, React, jQuery, CSS, Bootstrap, HTML, Git, Figma, Scrum

My strong points are creativity, problem-solving, active learning, attention to detail, teamwork and delivering within given timeframes.
